

QHSE Policy **Bauerberg Klein**

At Bauerberg Klein, a company specialized in technical consulting and professional training for the oil, gas, and energy industry, we are committed to operating under the highest standards of **Quality, Health, Safety, and Environment (QHSE)**, promoting a preventive and responsible culture both in our internal activities and in the services we provide to our clients.

Our QHSE policy is based on the following principles:

◆ **Technical and Educational Quality**

We guarantee excellence in all our consulting, advisory, and training services, ensuring that our training programs and technical solutions are aligned with industry best practices and the current challenges of efficiency, sustainability, and energy transition.

◆ **Occupational Health and Safety**

We prioritize the protection of the health and safety of our team, instructors, consultants, and participants in our activities, fostering safe, risk-free working environments, and promoting good operational practices across all our areas.

◆ **Environmental Responsibility**

We are firmly committed to environmental protection, integrating sustainability criteria into the design of our technical solutions and educational programs. We promote the rational use of resources and environmental awareness in all our courses, especially those related to HSE, environmental management, and energy transition.

◆ **Legal Compliance and Continuous Improvement**

We comply with all applicable regulations in quality, safety, and environmental matters. At the same time, we drive continuous improvement in our processes, based on systematic evaluation of results, client feedback, and the ongoing development of our professional team.

◆ **QHSE and Sustainability Training**

As a training company, we actively promote the development of competencies in QHSE, environment, and energy transition, through specialized programs, qualified instructors, and updated content that contribute to a safer, more efficient, and sustainable energy industry.

This policy is a fundamental part of our identity and organizational culture, guiding each of our decisions and services towards a responsible, innovative business model committed to the future of energy.
